

PAVAN KUMAR M

Sr. Security Analyst

+91 9945906284 | Electronic City, Bangalore | [virusknock.github.io/pavan](https://github.com/virusknock) | Itspaone7@icloud.com

ABOUT ME

Hey, I'm Pavan, part-time bug hunter 🐞 and full-time cybersecurity ninja, on a mission to secure the digital world one byte at a time. My software dev background gives me a builder's mindset, helping me understand not just how system break, but how to secure them from the ground up. When I'm not chasing security vulnerabilities, you can find me hiking up mountains, probably dreaming about my next burger adventure!

WORK EXPERIENCE

TECH MAHINDRA LIMITED

2022–NOW

Sr. Security Analyst

Conduct threat detection and log analysis using SIEM tools (Splunk, QRadar, ArcSight, ELK), supporting incident response and continuous monitoring of enterprise environments.

- Performed web application penetration testing, identifying SQLi, XSS, and CSRF vulnerabilities.
- Developed malware detection and improved firewall and IDS/IPS configurations.

SAR TECH SOFT PVT LTD

2021–2022

PHP Developer

Developed dynamic web applications using MVC, building backend databases from scratch for internal and client projects. Integrated payment gateways and delivered scalable solutions for business requirements.

- Built e-commerce platforms with secure payment processing.
- Developed document background verification systems.

NAVA VISION

2018–2019

Frontend Developer

Developed responsive web pages using HTML, CSS, and JavaScript with a focus on performance. Integrated APIs and ensured cross-device compatibility.

- Tested and debugged applications to ensure reliability and cross-browser compatibility.
- Stayed updated with modern web development trends and best practices.
